Casablanca, Morocco

Profile

Engineering student in IT Security and Digital Trust at ENSIASD, passionate about offensive cybersecurity and automated vulnerability analysis. Experience in application security, SAST/DAST, penetration testing of industrial protocols, and AI applied to cybersecurity. Seeking a 4-to-6-month final-year internship (PFE) for 2027 in software security, vulnerability analysis, pentesting, or AI/ML applied to cybersecurity.

Experience

- AI Security Engineer Intern** Jul 2026 - Sept 2026
Smart Automation Technologies Remote, Morocco
 - Designed an automated source-code security analysis platform integrating SAST, DAST, and SCA tools to detect vulnerabilities and poor development practices.
 - Designed an LLM- and RAG-based enrichment pipeline to explain vulnerabilities, suggest fixes, classify findings against the OWASP and CWE frameworks, and improve their prioritization.
- Cyber Threat Intelligence & AI Intern** Jul. 2026 - Aug. 2026
Moroccan Center for Polytechnic Research and Innovation (CMRPI) Kénitra, Morocco
 - Developed an AI-based early cyber-threat detection platform for SMEs, integrating CTI collection pipelines and machine learning models to identify emerging threats.
 - Designed and validated a real-time multichannel alerting system to support threat detection.
- Frontend Developer Intern** Jul. 2025 - Sept 2025
ReeWayy Remote, France
 - Secure development of the SuppWayy B2B platform, applying input validation, XSS/CSRF protection, and OWASP best practices, in collaboration with an international team on GitHub.
- Full Stack Engineer Intern** Jul. 2025 - Aug. 2025
DevForYou Agadir, Morocco
 - Developed PhytoVigil (Web, Mobile, AI) with React Native, FastAPI, and PostgreSQL, including authentication, access control, and API endpoint security.
 - Implemented a CNN model for plant disease detection achieving 98% precision and 97% recall, with a secured data processing pipeline.

Education

- National Higher School of Artificial Intelligence and Data Science (ENSIASD)** 2024 – Present
Engineering Degree: IT Security & Digital Trust Taroudant, Morocco
- Polydisciplinary Faculty of Taroudant** 2022 – 2024
University Diploma in Computer Science: Computer Engineering Taroudant, Morocco
- Youssef Ibn Tachfin High School** 2020 – 2022
Baccalaureate: IT Maintenance and Networks Agadir, Morocco

Projects

- Log Anomaly Detection (SOC)** 2025
 - Designed an ML anomaly detection system on a dataset of 5M system and network log entries, achieving 0.79 precision and 0.92 recall in a SOC environment.
- ModStrike: Modbus/ICS Security Tool** 2025
 - Penetration testing tool for Modbus protocols covering 10 security modules: network scanning, implementation of 4 attack types, and assessment of 5 classes of ICS/OT vulnerabilities.
 - Real-time traffic analysis engine with anomaly detection, configurable alerts, and report generation.
- AuditQuest: 2D ISO 27001 Audit Game** 2025
 - Developed a collaborative 2D game simulating an ISO 27001 audit, based on ISO 27002 controls, integrating evidence collection, compliance assessment, and risk analysis (likelihood × impact).

Skills

- Cybersecurity:** Web Security (XSS, CSRF, SQLi), Cryptography, Reverse Engineering, SAST/DAST, OWASP Top 10.
- SOC & Audit:** Log Analysis, Intrusion Detection, SIEM, Security Auditing, ISO 27001, Active Directory.
- SIEM & Monitoring:** Splunk Fundamentals, Wazuh Fundamentals, IDS/IPS, Security Event Analysis.
- Networking:** TCP/IP, DNS, HTTP/HTTPS, Network Traffic Analysis, Network Security.
- OT/ICS Security:** SCADA, PLC, Modbus TCP/RTU, Industrial Systems Security Analysis.
- Programming:** Python, JavaScript, C, C++, PHP, JAVA, SQL, Bash.
- Tools:** Linux, Wireshark, Burp Suite, Nmap, Metasploit, Git, Docker.
- AI & Data:** Machine Learning, Anomaly Detection, Data Mining, Data Analysis.
